Hi Eric,

Here are my bullets:

B3402/C3403 Marina Spill, Jersey City, NJ (Lucarino) EPA met on-site with representatives from both RPs and the property owner on 6/28/18 to discuss operations. PSE&G conducted pressure washing operations of the bulkhead seams from 6/21/18 through 6/25/18. The operations proved successful in liberating oil from the seams of the bulkhead. PSE&G collected samples of the oil for analysis to ensure the composition is dielectric fluid. Operations ceased when oil was no longer observed discharging from the seams. PSE&G has begun operations to agitate the surface sediments in an isolated area of the marina which appears to continue to discharge oil. The operations will continue until oil is no longer observed rising to the surface from the sediment. PSE&G continues to maintain containment and recovery measures within the marina.

PSE&G sent the three passive air sampling devices to the lab for analysis to ensure the addition of the two different types of tracer material is not detected. PSE&G is awaiting the results from samples. PSE&G will deploy an additional three air sampling devices this week.

PSE&G and Con Ed continue to discuss reducing the pressure within the transmission lines. An anticipated date for the operation to begin has been tentatively set for the end of July.

Sub Base Oil Spill, St. Thomas, USVI (Staiger, Lucarino, Touw) – EPA did not meet with the Commissioner of DPNR on Wednesday, June 20, 2018 as scheduled. DPNR was not prepared to meet with EPA or the representative from NPFC to discuss funding options for DPNR to perform work to prevent the further discharge of oil into Krum Bay. EPA is currently trying to arrange a conference call with DPNR to discuss how to move forward with the response.

NJ Inland Planning (Lucarino, Pellegrino) – OSC Lucarino met with representatives from NJDEP and Somerset County on Thursday, 6/28/2018 to discuss on-going efforts to develop Geographic Response Plans (GRPs) for Somerset County. EPA presented Somerset County with draft maps to determine sizing and determine what items are of importance to place on the maps for the Hillsborough area. All parties agreed on the items to be placed on the maps. EPA will make the adjustments and finalize the material for the GRPs. EPA will be meeting with Somerset County and NJDEP at the end of July to finalize GRPs for the Hillsborough area.

Thanks,
Kelli

Subject: Weekly reporting next week

For your divisional weekly reports to the RA next week, please send them by no later than **8 AM on Thursday, July 5.** (July 4th is a holiday, of course ... so you are welcome to send them by COB on Tuesday, July 3.)

Please continue to use the “R2 RA Briefing Book” email group.

Thanks,

Walter
